The Northeast Fisheries Science Center Reference Document series comprises informal reports produced by the Center for timely transmission of results obtained through work at various Center laboratories. The reports are reviewed internally before publication, but are not considered formal literature. The National Marine Fisheries Service does not endorse any proprietary material, process, or product mentioned in these reports. To obtain additional copies of this report, contact: Research Communications Unit, Northeast Fisheries Science Center, Woods Hole, MA 02543-1026 (508-548-5123 x 260).

INTRODUCTION

The following bibliography contains the peer-reviewed publications ("publications"), non-peer-reviewed publications & reports ("reports"), and abstracts for oral presentations & poster displays ("abstracts") which were prepared by Northeast Fisheries Science Center (NEFSC) employees, and which have a 1994 publication date. Some of the publications, reports, and abstracts by NEFSC employees deal more with administrative than scientific matters. Consequently, not all works are appropriate for inclusion in this bibliography. Only those works are included that have been specifically identified and provided by the NEFSC's Executive Staff. Authors who were NEFSC employees at the time they composed their works, and/or who were Center employees during 1994, are denoted in the list by all capital letters.

Editorial treatment of bibliographic entries is largely based on the CBE style manual, fifth edition¹. Three abbreviations used throughout the bibliography need to be explained: (1) "n.p." means the work--usually an abstract--is not paginated; (2) "n.n.k." means the volume number of the work is not known--a result of my not having the actual work in hand in order to prepare its bibliographic entry; and (3) "p.n.k." means the page number(s) of the work is(are) not known--again, a result of my not having the actual work in hand in order to prepare its bibliographic entry. Also, there are many foreign recipients of the issues of this series, most of whom do not use English as a primary language. Because English-language-based acronyms are particularly difficult to comprehend by non-English-using readers, the standardized abbreviations of these acronyms have been included within squared brackets immediately following the acronyms.
